V simplify travel

V make hotel content better

V enhance CX

V are Vervotech

Features our customers love

Hotel-level mapping

Provision of perfectly mapped hotel content with the help of AI to eradicate instances of duplicate properties

Accuracy

A staggering 99.999% accuracy in mapped hotel content is provided in addition to 98% coverage of hotels

Hotel attributes

Provision of over 40 different hotel attributes

Speed

Mapped hotel content can be delivered within 24 hours

Self-service portal

A dedicated self-service portal available to clients to have complete visibility over their mapped content

Granular APIs

Provision of APIs that are granular in nature to allow downloading of minute-level content parameters.

File-based integrations

In addition to API, there is also provision for CSV file-based integrations of suppliers

Up-to-date content

Data changes at supplier's end are regularly tracked and up-to-date content is pushed to the client's system

Non-hotel Accommodation (NHA) Mapping

Mapping not just done for hotels from global suppliers, but also from regional vacation rental providers.

24/7 support

No matter what region you are based out of, we have customer success team to promptly address your concerns

You're in good company
